THE UDDER WAY

One simple system for your kegs.

Three mobile apps and one dashboard. Run the operation. Manage the stock. Every fill leaves a fingerprint on the keg — who filled it, what went in, and when.

Orders, runs, scans, and a live map. No spreadsheets. No “where did that keg go?”

The Udder Dairy

GUIDES

manual.theudderdairy.com

THE WHOLE BUSINESS, ON ONE PAGE

A keg goes out full. It comes home empty. Then it goes again.

WHAT YOU GET

We replace the plastic bottle with a keg you can see.

The keg

18 litres. Food-grade. Washed and filled at your dairy. One keg replaces a crate of bottles.

The tap at the venue

Café, deli, hotel, or office. They pour milk. They do not manage a warehouse.

The software

Orders, runs, scans, stock, and a live map. No spreadsheets. No “where did that keg go?”

Who uses what

Dairy team – fill, clean, see stock, talk to venues.

Driver – today’s run, scan in, scan out, navigate.

Venue – order milk, see what’s on tap, watch the driver.

You, on the computer – the same picture, bigger.

THREE APPS, ONE SYSTEM

Each person gets the app for their job.

DAIRY

The Udder Dairy

For the plant. Fill, clean, customers, orders, stock, and where the drivers are.

DRIVER

The Udder Driver

For the road. Today's stops, scan to deliver, scan to collect, turn-by-turn.

VENUE

The Udder Venue

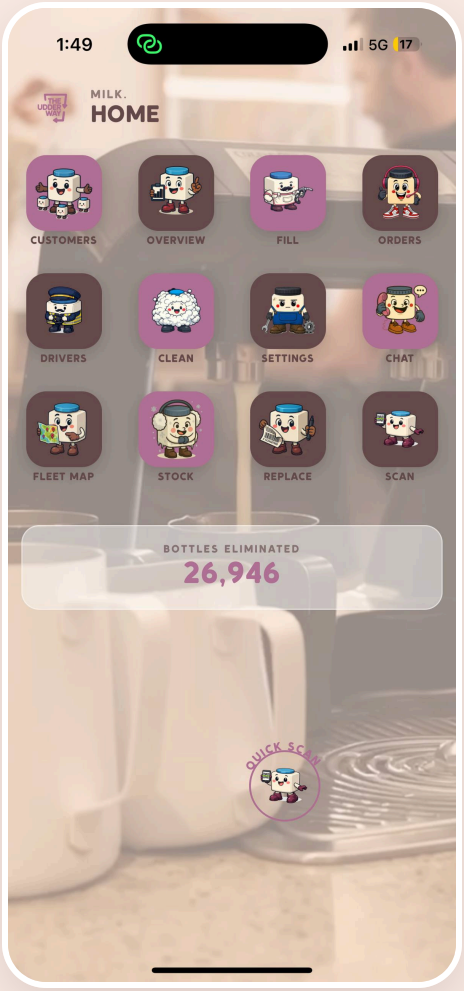

For the café or shop. Order kegs, see stock, watch the driver, message you.

Plus the dashboard

Same information, on a big screen. Owners use this for the week, not for scanning a keg. Link: **theudderdairy.com**

THE UDDER DAIRY · HOME SCREEN

Everything the plant needs, one tap away.

Customers
Venues you supply. Who has kegs right now.

Overview
Today at a glance. Cool room, going out, coming back.

Fill
Scan a clean keg, put milk in, set the use-by.

Orders
What venues asked for, and what you will send.

Drivers
Who is on the road, and their runs.

Clean
Wash returned kegs so they can be filled again.

Settings
Your dairy, products, staff, and how you work.

Chat
Talk to a venue or a driver without a phone tag.

Fleet Map
Live map. Drivers and venues, not a guess.

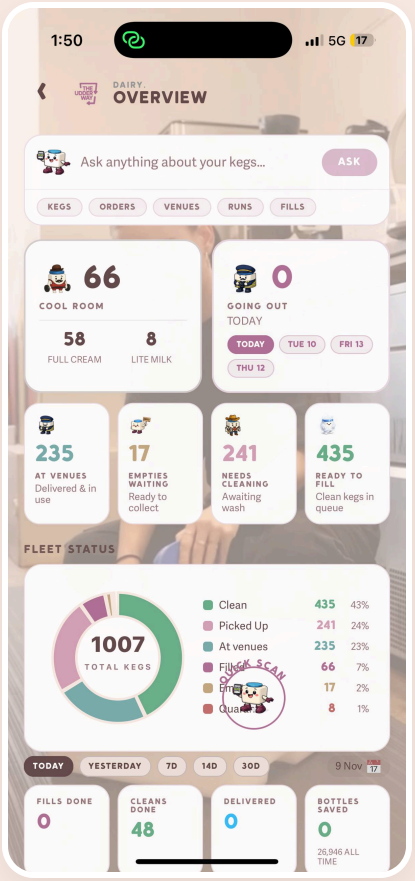

Stock
Kegs in the cool room, ready to go.

Replace
Swap a damaged label. The keg keeps its history.

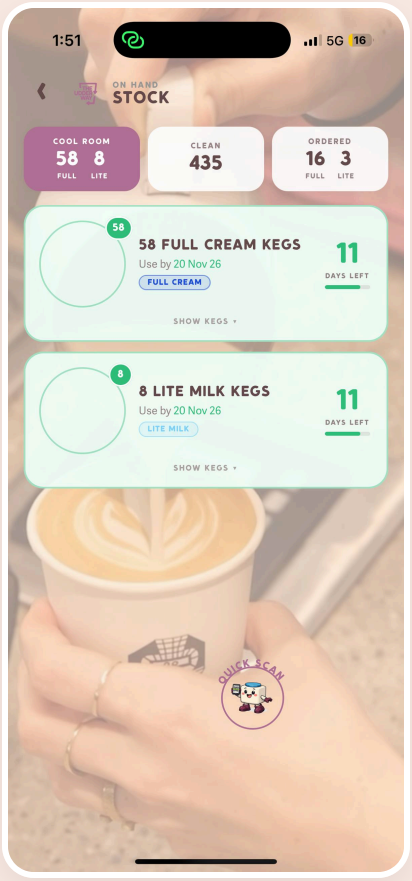

Quick Scan
The round button. Look up any keg in one second.

THE UDDER DAIRY · A NORMAL MORNING

Overview, stock, and where everyone is.

Overview — cool room, kegs going out today, kegs coming home, bottles you have already replaced.

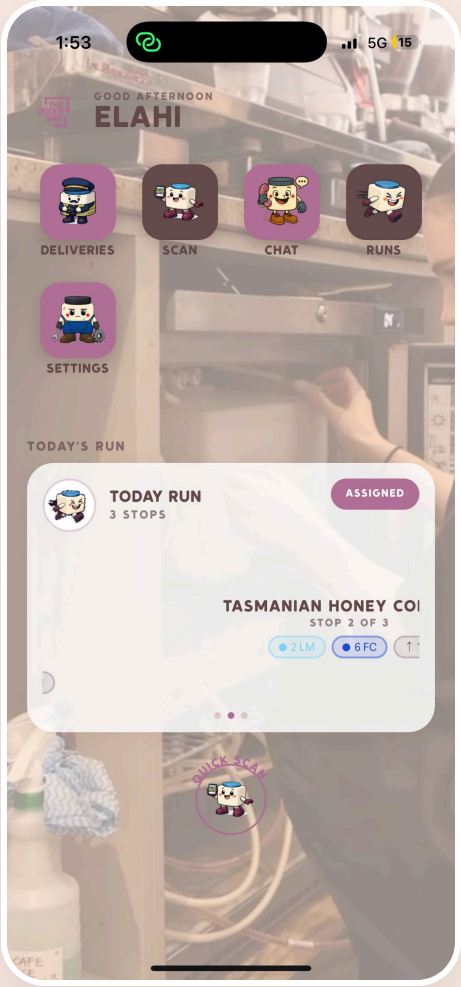

Stock — full cream and lite, counted, not estimated.

Fleet map — driver on the road, venues as pins.

THE UDDER DRIVER · HOME SCREEN

The driver only sees today's work.

Deliveries
Stops still to do.

Scan
The main job. Scan a keg to deliver or collect.

Chat
Message the dairy or the venue.

Runs
Today's run, stop by stop.

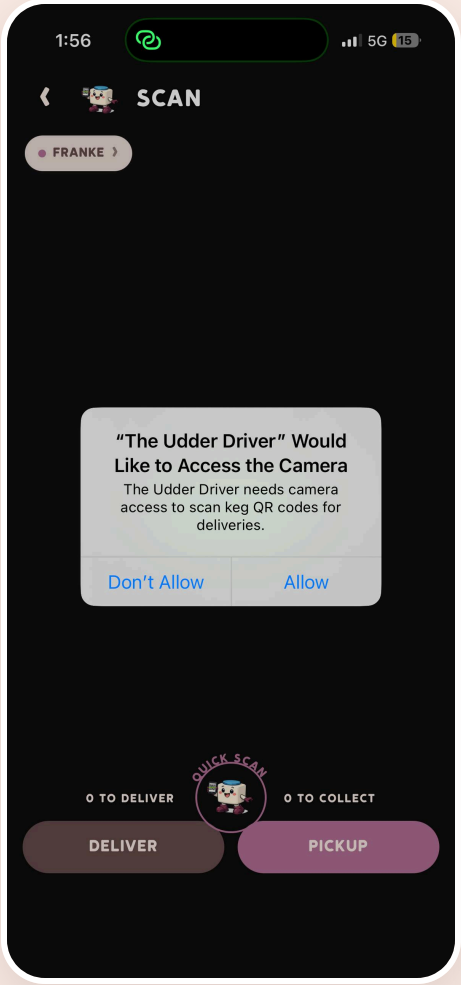

Settings
Their own login. Nothing else.

Today's run sits under the icons

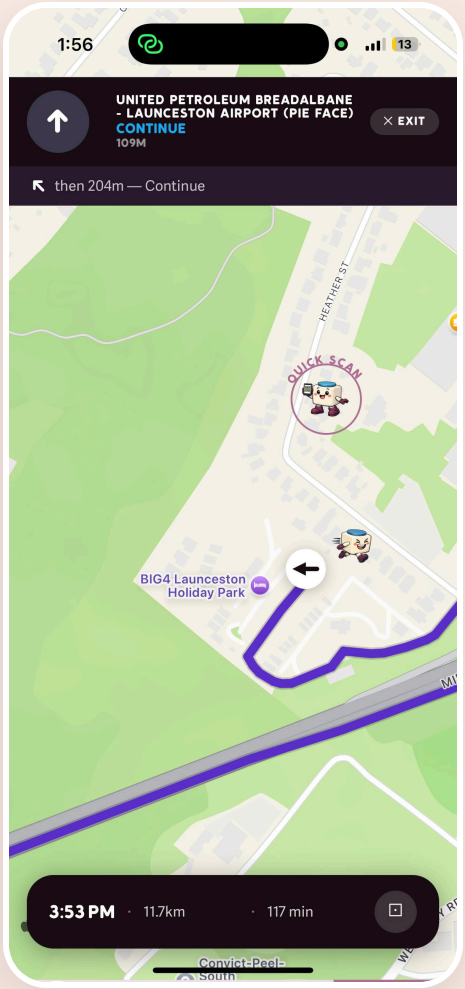

Stops, kegs to drop, kegs to pick up. They open a stop, scan, and move on. The dairy sees it the moment they scan.

THE UDDER DRIVER · ON THE ROAD

Scan the keg. The map does the rest.

Scan — deliver or collect. The keg changes status by itself.

Navigation — next venue, how far, how long.

What the venue feels

They are not calling to ask "are you close?". Their app already shows the driver, the minutes, and the kegs on the truck.

If a stop changes, the run updates. The driver does not retype the list.

THE UDDER VENUE · HOME SCREEN

The café does not need a training day.

Deliveries
What is coming, and what arrived.

Orders
Ask for more kegs. Pick the day.

Chat
Message the dairy or today's driver.

Stock
Kegs on site, full and empty.

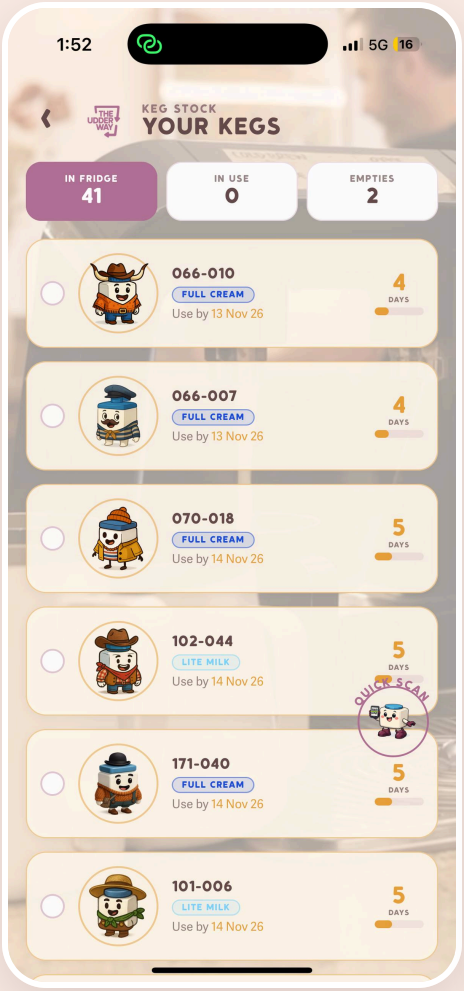

History
Past drops and pickups.

Staff
Who at the venue can log in.

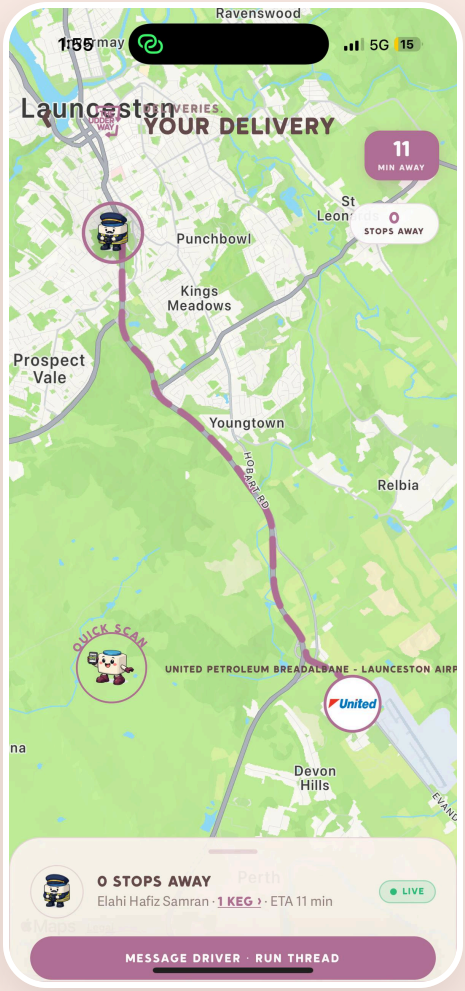

Settings
Their PIN, their details.

THE UDDER VENUE · WHY THEY STAY

They can see the milk, and the driver.

Their kegs — type, use-by, and how long it has been there.

Live delivery — minutes away, who is driving, how many kegs.

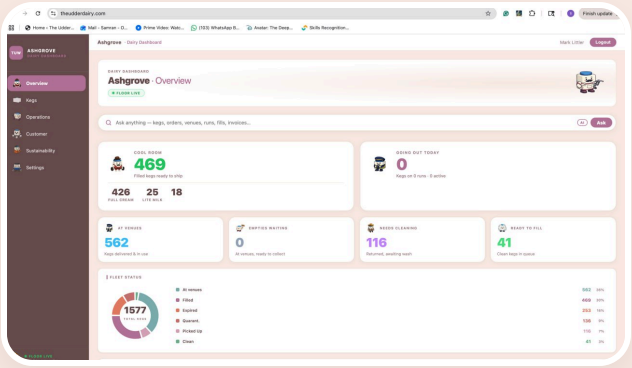

What you can tell a venue

Order in the app. Watch the driver. See what is on tap. Message us if something is wrong.

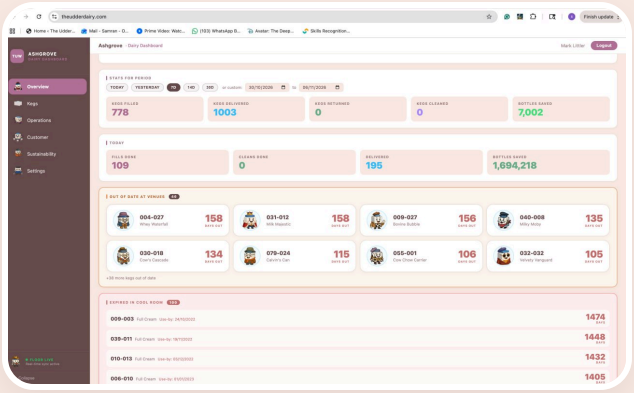

They do not see other venues. They do not see your whole dairy.

THE DASHBOARD · FOR THE OWNER

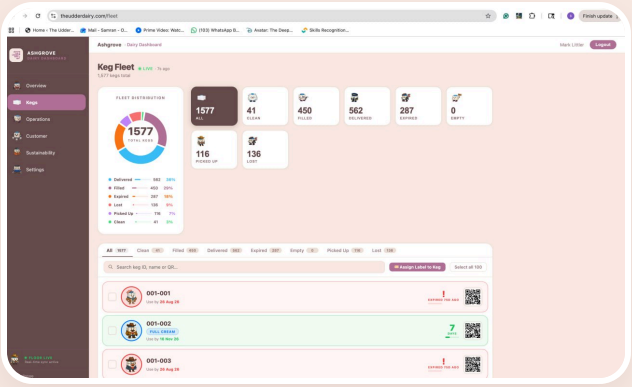

The same story, on a computer.

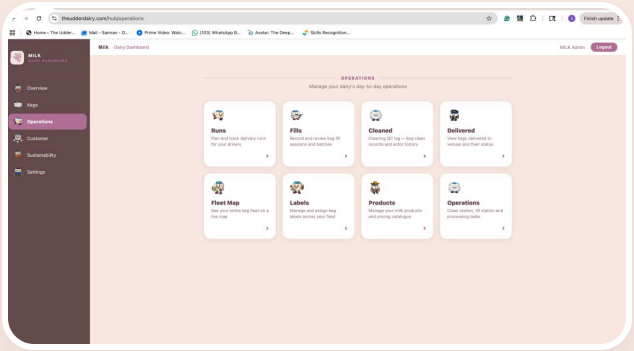

Today — filled, out, back, bottles replaced.

The week or the month, not just this morning.

Every keg, with its status.

Runs, fills, cleaning, products — one place.

AFTER YOU SAY YES

We set it up. You pour milk.

1. Your dairy

Name, products, delivery days, staff. We load the kegs you already have.

2. Your people

Dairy logins, driver PINs, venue PINs. Each person gets the right app.

3. First run

Fill, deliver, collect, clean. You watch it on the phone and on the dashboard.

Links we leave with you

Dashboard – **theudderdairy.com**

How-to guides – **manual.theudderdairy.com**

The guide today covers the Dairy app. Driver, Venue, and Dashboard guides will live on that same link.

Apps – The Udder Dairy · The Udder Driver · The Udder Venue, on the App Store.
